

An integrated encyclopedia of DNA elements in the human genome

The ENCODE Project Consortium. Nature

Landscape of transcription in human cells

Djebali and Davis et al. Nature.

The accessible chromatin landscape of the human genome

Thurman, Rynes and Humbert et al. Nature

An expansive human regulatory lexicon encoded in transcription factor footprints

Neph, Vierstra, Stergachis and Reynolds et al. Nature

Architecture of the human regulatory network derived from ENCODE data

Gerstein, Kundaje, Hariharan, Landt and Yan et al. Nature

The long-range interaction landscape of gene promoters

Sanyal and Lajoie et al. Nature

Analysis of variation at transcription factor binding sites in Drosophila and humans

Spivakov, M. et al. Genome Biol.

Annotation of functional variation in personal genomes using RegulomeDB.

Boyle, A.P. et al. Genome Res.

Cell type-specific binding patterns reveal that TCF7L2 can be tethered to the genome by association with GATA3

Frietze, S. et al. Genome Biol.

ChIP-seq guidelines and practices used by the ENCODE and modENCODE consortia.

Landt, S.G. et al. Genome Res.

Classification of human genomic regions based on experimentally determined binding sites of more than 100 transcription related factors

Yip, K.Y. et al. Genome Biol.

Combining RT-PCR-seq and RNA-seq to catalog all genic elements encoded in the human genome

Howald, C. et al. Genome Res.

Deep sequencing of subcellular RNA fractions shows splicing to be predominantly co-transcriptional in the human genome but inefficient for lncRNAs

Tilgner, H. et al. Genome Res.

Discovery of hundreds of mirtrons in mouse and human small RNA data

Ladewig, E. et al. Genome Res.

Functional analysis of transcription factor binding sites in human promoters

Whitfield, T.W. et al. Genome Biol.

GENCODE: The reference human genome annotation for the ENCODE project

Harrow, J. et al. Genome Res.

Linking disease associations with regulatory information in the human genome.

Schaub, M.A. et al. Genome Res.

Long noncoding RNAs are rarely translated in two human cell lines

Bánfai, B. et al. Genome Res.

Modeling gene expression using chromatin features in various cellular contexts

Dong, X. et al. Genome Biol.

Personal and population genomics of human regulatory variation.

Vernot, B. et al. Genome Res.

Predicting cell-type-specific gene expression from regions of open chromatin.

Natarajan, A. et al. Genome Res.

RNA editing in the human ENCODE RNA-seq data

Park, E. et al. Genome Res.

Sequence and chromatin determinants of cell-type-specific transcription factor binding.

Arvey, A. et al. Genome Res.

Sequence features and chromatin structure around the genomic regions bound by 119 human transcription factors

Wang, J. et al. Genome Res.

Simultaneous SNP identification and assessment of allele-specific bias from ChIP-seq data

Ni et al. BMC Gen.

The GENCODE pseudogene resource

Pei, B. et al. Genome Biol.

The GENCODE v7 catalog of human long noncoding RNAs: Analysis of their gene structure, evolution, and expression.

Derrien, T. et al. Genome Res.

Ubiquitous heterogeneity and asymmetry of the chromatin environment at regulatory elements.

Kundaje, A. et al. Genome Res.

Understanding transcriptional regulation by integrative analysis of transcription factor binding data.

Cheng, C. et al. Genome Res.

Widespread plasticity in CTCF occupancy linked to DNA methylation

Wang, H. et al. Genome Res.

A highly integrated and complex PPARGC1A transcription factor binding network in HepG2 cells.

Charos, A.E. et al. Genome Res.
